

Product Overview

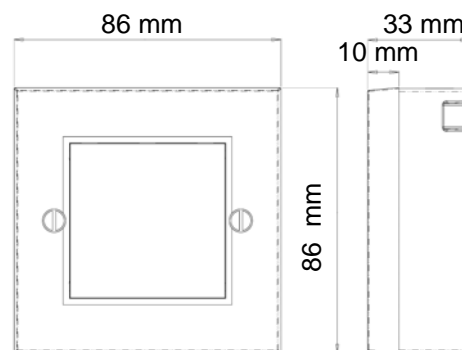

The Pressac Hardwired ADSL filter is designed to allow the connection of hardwired auto diallers to broadband enabled lines. The unit consists of a surface mountable box that contains a standard SIN 346 compliant ADSL filter circuit which provides the correct filtering of signals to allow simultaneous use of both the auto dialler and broadband services. Connections to the filter unit are made using industry standard screw terminals.

Connection ports : Line in : 3 way screw terminal (pins A and B only required)
Line out : 3 way screw terminal (pins 2, 3 and 5 required)

Key Features : Connections internal to the unit
Tested to SIN 346 Issue 2.3
Compatible with Calling Line Identification working

Key Benefits : Enables auto diallers to be connected to broadband enabled lines
Easy to install
Connections via simple screw terminals
